***Allowable Subject Matter***

1. Claims 56-83 and 85-107 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record discloses a delta-sigma modulator that comprises the recited limitations of claims 56-83 including the fifth means for clocking the first means and second means to apply the first set of signal to the third means on a first edge of a clock pulse and apply the second set of signals to the fourth means on a second edge of the clock pulse.

The prior art of record also fails to teach or suggest the recited combination of the delta-sigma modulator of claims 85-107 including the slave latch that coupled to the master latch for providing a second set of the third and fourth signals complementary intermediate signals; and the means for switching current through the first differential pair of transistors and the second differential pair of transistors after the input thereof have settled to a full logic value. For these reasons, claims 56-83 and 85-107 are allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
